

# Cable Accessories for Microinverter of HMS Series

## AC Trunk Cable, 12/10 AWG Cable

AC Trunk Cable is used to connect the microinverter to distribution box.  
The Trunk Connector on the AC Trunk Cable is evenly distributed at intervals, Hoymiles provides AC Trunk Cable with different AC Trunk Connector spacing.

## AC Trunk Connector

The AC Sub Connector of the microinverter can be inserted into the port of the AC Trunk Connector.  
Plug and play connectors speed up and simplify installation.

## AC Trunk Port Cap

Used to protect vacant AC Trunk Port.

## AC Trunk End Cap

Used to protect the cable port of AC Trunk Connector at the end of the AC branch.

## AC Trunk Port Disconnect Tool

Used to disconnect the connection between the microinverter and the AC Trunk Connector.

## AC Trunk Connector Unlock Tool

Used to unlock the AC Trunk Connector upper cover so that the cable can be removed, replaced, and the AC Trunk End Cap installed.

## DC Extension Cable

Connect the microinverter and the PV module when the distance between this two exceeds the original cable length.
